

# The VaxAmerica Difference

## Safety First!

*Keeping your employees well is only second to keeping them safe.*

Unfortunately, most consumers are unaware of the risks inherent in a compromised supply chain until it touches them personally.

### Do you know where your vaccine has been?

- ▶ Could it have been to more than one clinic?
- ▶ Purchased from a secondary distributor?
- ▶ Left in a non-temperature-controlled environment?

### Risks of unsafe storage and handling include, but are not limited to:

- ▶ Diminished efficacy of vaccine
- ▶ Counterfeit product entering the supply chain
- ▶ Potential for health risks from a tainted supply

## The VaxAmerica Safety Pledge

VaxAmerica from FFF Enterprises, the nation's largest and most trusted distributor of flu vaccine, pledges to maintain the integrity and efficacy of vaccine – from purchasing and storage to delivery and administration – because consumer safety is always our first priority.

## The VaxAmerica Safety Steps

- ▶ VaxAmerica will ship vaccine safely and legally for your clinic.
- ▶ VaxAmerica will only ship vaccine in specially designed 48-hour temperature-controlled boxes, delivered 24–48 hours prior to your clinic.
- ▶ VaxAmerica will send the exact number of doses reserved through our online registration to ensure that vaccine is administered only to the individual it was intended for and that extra vaccine is not left over and inadvertently stored or transported unsafely for use in another clinic.
